

Gribe it regularly."

Indigestion is making an awful record as a cause of sudden deaths. It is beating heart-failure in its ghastly harvest.

You read in the pap rs daily of apparently healthy and even robust men being suddenly attacked with acute indigestion after enjoying a hearty meal, and of their dying in many cases before a physician could be called in.

This should be a warning to you who suffer with regular or periodical attacks of indigestion. If these unfortunate victums of acute indigestion had taken a small dose of Green's August Flower be-

tims of acute indigestion had taken a small dose of Green's August Flower before or after their meals they would not have fallen a prey to such sudden seizures.

¶August Flower prevents indigestion by creating good digestion. It also regulates the liver, purifies the blood and tones up the entire system in a natural way.

THE LOWER EAR OF CORN.

When Used as Seed It Usually Pro duces Shorter Cornstalks and Makes More Corn.

We have often advised the farmer in the south to select, for a term of years, the lower ear on a twin-eared stalk, for the purpose of breeding down the tall stature of their corn, so that it can be planted closer together That it will have this effect we well know from long experience. But it seems that some have assumed that the lower ear is always and anywhere conducive to greater production. We believe that this, too, is usually the case if the work is continued long enough to show its effect, for the lower ear will certainly inherit a greater ten-

Underwood

farmer wrote us that he had been fel-lowing our directions in saving his seed corn and that his corn was making from three to five ears on a stalk, and that his neighbors were all seeking his corn for seed. In the annual report of the Rhode Island station, the result of one year's selection of the lower ear as compared with the upper one, showed a result somewhat in favor of the upper ear, and from this one testhey have concluded that "the supposition that to increase the number of ears one should choose always from the ower one, because that is the last one eveloped, is shown to be erroneous." Since no one had advised the continu-ous selection of the lower ear after the ideal plant is secured, the advice is rather superfluous. In fact, no one experiment can determine the tendency of any work in plant breeding. We have found that not less than seven years are It Is an Excellent Practice If They found that not less than seven years are needed to fix the character of corn as a strain or race, and after breeding for the ideal plant we can thus select with some confidence the ideal ears from these plants. The Rhode Island report gives cuts showing the corn from lower and apper ears, and so far as we can judge from the cut, the greater luxuriance is in favor of the lower ear seed. The misake seems to have been in assuming that what has been advised as a means of getting the ideal plant is always, and in any climate, the best for the crop at once, and that a single experiment can letermine the value of any method of plant breeding. Breeding to cure device the maway in the cellars, I dig with a plant is produced to found that not less than seven years are found that not less than seven years are needed to fix the character of corn as a strain or race, and dater breeding for the feet long. It is found that after putting water on the soil for a certain length of time the tendency of the alkali is to rise toward the surface,

harmful salts near the surface. The waters used in irrigation, it is also found, contain alkali which helps to increase the deposits after the water dries away. After the alkali once begins to give serious trouble it has some times been necessary to abandon the furnish sufficient water to flood the land and soak out the alkali.

WASHING POTATOES.

once, and that a single experiment can washed all my potatoes, and have letermine the value of any method of never lost a bushel by rot after I put kiowa, lately appeared in a big one, them away in the cellars. I dig with a ects in the plant for a certain climate Hoover digger, and pick up the potaand breeding for continuous production toes as fast as they are dug. They liffer very materially.—Practical are then hauled to a suitable rack for this way 100 bushels are washed clean dol and he says it cured him. He recough in ten minutes to bake or boil. Work Is Hampered by Large Quanti- I let them lie for a few minutes only, cured." Kodol Dyspepsia Cure digests then pick up and put in one bushel sun or wind from two to three hours; It is estimated that there remain in long enough to dry nicely. The potathe dry region of the west about 600,-000,000 acres of vacant public land, and dry cellar, where they remain until

amount. The area now occupied and irrigated is only 6,500,000. If during the next 30 years only 20,000,000 acres more should be placed under irrigation, the land so reclaimed would provide homes for at least 12,000,000 to 15,000,000 peonle, as a very small area is sufficient to years. I have put potatoes in bins often when they were a little wet, or had some defective ones among them, and in a few weeks had to move and sort them. But since I have used crates for potatoes and other roots, I find that when put away the care and trouble is over, and no further at-

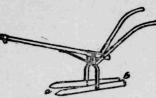

tention is necessary.
"I would recommend this method to all farmers, large or small. All that cld-fogyism of storing potatoes with dirt and mud on them is nonsense While we all know that potatces will keep well if dry with a little dirt on them, I know they will keep if washed perfectly clean and dry, and they will come out in the spring good and

King Clay 594-(Sire of Clay King) is a son of Harry Clay 45; dam Modesty 2:26½, by Tom Wodder 147; 2 dam Weils Star (dam of Artilery 2:21½), by American Star 14;3 dam by Emmon's Duroc.

Clay King, with any kind of stud opportunities, would

(am of Arthery 2:21/5). By American Star 14/3 dam by Emmon's Duroc.

Clay King, with any kind of stud opportunities, would today be in the first fight of successful sires of extreme speed. His stud career is practicallyinst begun, and there is not a horseman in the Blue Grass State who does not regard him as a wonderful sire of early and extreme speed. Every man at the Lexington track has seen his get accomplish what has never been done by the produce of any other horse; they have seen his year, ing step quarters in 35-1-4 second and then sell for startling prices; they have seen his older representatives show as much speed, gameness and gennine race horse qualities as those of any sire ever quartered in Kentucky.

Clay King will make the season of 1905 at the feed and sale stable of W B Burton, in Lancaster at the low price of TWELVE DOOLLARS and FIFTY CENTS to insure a living colt. A lien retained upon the foal to se-

insure a living colt. A lien retained upon the foal to sere the payment of the season. All care will be taken to event accidents to stock intrusted to our care, but should stocur we will not be responsible for the same.

Cures Kidney and Bladder Diseases in Every Form-Many People Have Kidney Trouble and Do Not Know It.

HOW TO FIND OUT.

It is the function of the kidneys to filter and purify the blood which is constantly

passing through them.

When the kidneys are out of order the other organs are affected immediately and you may have symptons of heart trouble, stomach and liver trouble, and other ailments, which are all owing to the kidneys being weak and out of order.

If you are sick Foley's Kidney Cure will strengthen and build up the worn out tissues of the kidneys so they will act properly and the symptons of weakness, heart, stomach and liver Forrest Stapp, Buckeye, Ky trouble will disappear and you will be restored to perfect health.

HOW TO FIND OUT.

You can easily determine if your kid-neys are out of order by setting aside for 24 hours a bottle of the urine passed upon arising. If upon examination it is cloudy or milky or has a brick-dust sedlment or small particles float about in it, your kidneys are diseased and Foley's Kidney Gure should be taken at once. Foley's Kidney Cure is pleasant to

take and acts directly upon the parts affected and you begin to feel better It corrects slight disorders in a few

days and it has cured many obstinate cases after other treatment had failed.

Doctors Said He Would Not Live.

Peter Frey, of Woodruff, Pa., writes:
"After doctoring for two years with the best physicians in Waynesburg, and still getting worse, the doctors advised me if I had any business to attend to I had better attend to it at once, as I could not possibly live another month, as there was no cure for me. Foley's Kidney Cure was recommended to me by a friend, and I immediately sent my son to the store. I immediately sent my son to the store for it and after taking three bottles I be-gan to get better and continued to im-prove until I was entirely well."

Make Money

If you are industrious and capable you can make money there. The big ranches are breaking up into small farms that need more workers to care for the increased

product. The towns and cities are prosperous because the country is prosperous.

There are great valleys of the richest soil in America waiting for you. If you have a little capital you can own one of these small farms yourself, or you can rent one on shares and pay for it out of the product in a few years. We will send you descriptive booklets and folders giving full information about the moneymaking opportunities for every member of the family.
